- **Bug fix:** Last changed info is now better handled for Notes, Sources, Repositories and Citations
- **Bug fix:** Lai
- **Improvement:** <.log> selecting for report
- **Added:** Added progress of creating of places, translation
- **Added:** File size of opened GEDCOM file

Sources

- **Improvement:** The last changed date is now displayed below the list

Chronology

- **Bug fix:** Fix for badly formatted dates in the chronology
- **Bug fix:** Family events other than marriage or divorce were not listed in chronology of the person.

Places

- **Bug fix:** The selection of all places with coordinates showed all places
- **Bug fix:** Cosmetic refresh issue with URLs attached to places
- **Improvement:** The Get Coordinates algorithm to go and get the latitude and longitude of a place is much improved.

- **Improvement:** Increased the time-out from Google Maps for places preview

- **Added:** You can add a welcome text to the home page
- **Added:** Feedback button (yellow) is added to different pages to generate a mail for feedback purposes
- **Added:** The statistics page now shows graphs and charts, and a lot info is added
- **Added:** Images page is added (per image) with extra info and clickable links of the people on the page
- **Added:** if files or folders don't exist, the input field becomes red, and the OK button is disabled
- **Added:** The Places page now also has a link to the location (Google Maps)

Media

- **Bug fix:** The Add people from Bookmarks icon is now also accessible when NO person is selected in the list.
- **Bug fix:** Relocation of media works again. If a media is not found in the media list, the background is red. Double clicking the item shows a dialog box that allows you to relocate the file, which is then copied to the media folder of MyBlood.
- **Added:** Share buttons is added to upload an image to a site on the internet. We consider this feature as being in BETA for the 1.2 release. Currently available sites are:
 - Picasa (you'll need a Google account)
- **Added:** Number of media in the list is displayed in a new way, which also shows progress will building the list of media.

B. Known bugs or limitations in v1.2

1. Date formats that currently are not converted

- Some date formats in GEDCOM are not interpreted and can give an incorrect date interpretation. Known items are:
 - 1947/8 → range ... 1947/52 → range
 - BC, B.C., BCE, B.C.E.
 - ?

2. Name's or places with special characters can give problems

- Not supported characters in names and places are:
 - =, &, %, return

3. GEDCOM import and Merge

- MyBlood currently doesn't allow you to import an additional GEDCOM file into the open file.
- Merging data in MyBlood is not yet supported.

4. Dates

- Currently only support for the Gregorian Calendar
